### DETAILED ACTION

1. This Office Action is in response to applicant's amendment filed on October 24, 2002. Claims 2,6,11 and 12 were cancelled.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1,5,7,8,20 and 22 are rejected** under 35 U.S.C. 102(b) as being anticipated by US Pat No 3,912,891 to Mercer et al (Mercer).

Regarding claims 1,20 and 22, Mercer discloses a latch mechanism comprising a keeper (88,90 and 94) that includes a biasing member (94) and a head portion (90) extending from the biasing member. The head portion includes a catch (90) and a lock release projection (88).

A rotatably handle (22) is selectively operable to uncouple the door from the apparatus. The handle includes a handle retainer (20) coupling the handle to the door and a handle hinge pin (36) coupling the handle to the handle retainer. The end of the head portion acts as a switch actuator to actuate a switch (100).

As to claim 5, Mercer discloses that the keeper head portion is integrally with the biasing member.

As to claim 7, Mercer discloses that the switch actuator (the head portion) is configured to actuate a switch (100) from an open to a closed state.

As to claim 8, Mercer discloses that the handle retainer (20) is fixedly attached to the door.

***Allowable Subject Matter***

4. **Claims 13-19 and 21 are allowed.**
5. **Claims 3,4,9,10 are objected** to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents cited further show the state of the art with respect to latches.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos Lugo. The examiner phone number is (703)-305-9747.
